Student Research Presentations

“Characterizing the Thermal Aggregation of a Biopolymer,”
Mario Alberto

“Achieving Flat Gold Surfaces for the Organization of Organic Molecules,” **Jacob Martin**

“Cloud Watching: Using Images to Analyze Shallow Cumulus Clouds,” **Justin Thompson**

“Using Depolarized Dynamic Light Scattering to Characterize Microgel Dependence on Synthesis Temperature,” **Andrew Scherer**

“The Optimization of Hydroxypropyl Cellulose (HPC) Microgel Imaging and Characterization Using Scanning Electron Microscopy (SEM),” **Samantha Tietjen**

Join SPS on

Thursday, November 7 in SR 151, 11:30 am

to hear five CSU students present the research they have done alongside CSU professors over the summer.

Pizza and Beverages provided
